EXPERIENCE:

2014 – present **Anki, Inc.**

Address: 55 Second Street, San Francisco, CA 94105

Supervisor: Tom Eliaz

Maintain Drupal marketing and commerce site using standard LAMP stack and Acquia's drupal hosting product. Moving toward a "headless Drupal" model where front end is ReactJS/Flux and backend is Drupal 7/8 served by Phip 5.6/7.0x. Integrate magneto Ecommerce website with Drupal 7/8 using Magento's REST API.

Sites: <https://anki.com>

Keywords: Drupal, PHP 5.x, MySQL, Linux, Drupal distribution, D7, D8, Bash, Jekyll, Node.js, React.js, Flux/Redux.js, pantheon, acquia, cloud hosting

2011 - 2014 **Apigee, Inc.**

Address: 10 South Almaden Avenue, San Jose, CA 95113

Supervisor: Mike Gardner

As a developer with 15 years of experience I inherited a PHP—based Drupal 6 product poorly architected and minimally maintained. I Architected a PHP-based Drupal 7 migration and Created, Managed, Maintained and Upgraded 100+ Drupal-based developer portal websites eventually leading a team of 10 developers. We originally launched on AWS-based servers and managed them via Puppet scripts and a Jenkins instance. We then migrated to Pantheon's Drupal cloud hosting solution. Created open-source PHP-SDK to access API Management Product to Create, Manage and Monetize REST APIs with node.js integration. We also explored Jekyll-based solutions to developer portal and integration with compiled HTML as well as a couple of Node.js CMS options.
